

Chemplast Sanmar Karaikal wins First Prize for its Industrial Garden

The “Industrial Garden” of Chemplast Sanmar at Karaikal was awarded the 1st prize at the 16th Annual Flower Show held at Karaikal.

Chemplast has won this recognition from the Puducherry Government, several times in the past few years. This is the 7th time that they are receiving an award in this category.

T Sundaresan, Divisional Manager, Production, Chemplast Sanmar received the award from Dr R Sathiyaseelan, Director of Agriculture, Puducherry in the closing ceremony function organised on 20.02.2011

Experts from the Agriculture Department and the Karaikal College of Agriculture adjudged Chemplast Sanmar's spread of green around their plant as the best in the "Industrial Garden" category. The annual event recognises individuals, households, farmers and industries for their efforts at greening their surroundings.

The Karaikal plant of Chemplast has a green belt of over 16 acres and houses over 3500 trees. The casuarinas and Korean grass, a welcome sight at the plant, stand testimony to the efforts behind this.

Active participation and support by the labourers from the locality, has helped them in the process. Their traditional know-how along with the organisation's will and inclination to spend towards the cause of environment has helped combat the task of dealing with a difficult terrain.
