

XOMOX

RWTUV

Its enduring relationship with Xomox Corporation, USA (a subsidiary of Crane Co.)—a global manufacturer of a full line of process valves and actuators—has enabled Xomox Sanmar to meet the exacting requirements of the Indian chemical process industry. It is now an important base in the Asia Pacific region for sourcing fluorocarbon-lined valves and sleeved plug valves.

Xomox Sanmar Limited

Xomox Sanmar Limited

Manufacturing Facilities

A complete range of machine tools and assembly testing equipment to manufacture a vast array of valves conforming to international standards.

Product Range

Designed to be installed in critical applications, these valves can operate reliably under demanding conditions. They are extensively used in the petrochemical, fertiliser and other process industries to handle corrosive, toxic and hazardous fluids encountered in the chemical process industry.

- Sleeved plug valves
- 2/ 3/ 4/ 5 way flanged/ screwed/ socket weld/ butt weld (partially and fully jacketed/ full port)
- PFA/ FEP lined plug/ ball/ butterfly/ swing check/ ball check valves
- High performance butterfly valves of wafer and lug styles
- Vane type pneumatic actuators—double acting, fail safe

Capacity

Over 60,000 valves a year

Location : Viralimalai, Tiruchirapalli

Joint venture partner : Xomox Corporation, USA, a subsidiary of Crane Co.

A constituent of **SANMAR** Engg Corpn Ltd
