

CAB-O-SIL® H-5 Fumed Silica

CAB-O-SIL® H-5 untreated fumed silica is a synthetic, amorphous, colloidal silicon dioxide that is manufactured by high temperature flame hydrolysis process and is generally regarded as unique in industry because of its particle characteristics.

CAB-O-SIL® fumed silica's extremely small particle size, its enormous surface area, its high purity, and its chain-forming tendencies set it apart in a class of its own.

CAB-O-SIL® fumed silica is a light, fluffy powder that is white in appearance and is used in many applications and variety of industries.

Typical Properties

Product Properties	UOM	Values
BET Specific Surface Area	m ² /g	300
pH (4% aqueous slurry)	-	3.8 - 4.3
325 Mesh Residue (44 micron)	%	0.02 max
Tamped Density	g/L	60 max
Loss on Heating*	%	1.0 max
Assay	%	99.8 min

* at the time of packaging

Packaging Options

CAB-O-SIL H-5 fumed silica is packaged in 10kg multi-wall Kraft paper bags.
